Art Unit: 1625

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: After the title at p. 1 - - This application derives priority from verified Provisional Applications 60/428315 filed May 22, 2003 and 60/472598 filed Nov. 22, 2002. - - has been inserted.

The following is an examiner's statement of reasons for allowance: See applicants' arguments relating to the fact that in the examples of the reference that the boron containing intermediate is a naphthyridinone amide while applicants' boron containing intermediate is a naphthyridinone ester. Also note that in the Scheme 1 of the reference that when the naphthyridinone ester is used as the intermediate that the boron containing group is not on it but on the other reactant. Further note the difference in the conversion of the naphthyridinone ester X to the naphthyridinone amide I. In the reference after hydrolysis to the carboxylic acid, the acid is converted to the acid halide or anhydride while in the instant case it is converted directly to the amide.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
